Data intake by: Richard Coltenback

Data intake reviewer: None

Data storage location: <https://github.com/RColtenback/File-Ingestion-Week-6.git>

Tabular data details:

PV22.csv

Total number of observations	15435607
Total number of files	1
Total number of features	43
Base format of the file	.csv
Size of the data	2.9 GB

Proposed Approach:

- Although I didn't have to change anything about the dataset, during the assignment I changed the spaces in the column heads to "_", from "Parking Violation" to "Parking_Violation", for example, making them all one word.
- I did see there were some spaces in the data, but that has more to do with the type of parking violation committed rather than holes in the dataset.
